Check the Tutorial tab to know learn about division operators.

Task

The provided code stub reads two integers, a and b, from STDIN.

Add logic to print two lines. The first line should contain the result of integer division, a // b. The second line should contain the result of float division, a / b.

No rounding or formatting is necessary.

Example

$a = 3$

$b = 5$

- The result of the integer division $3//5 = 0$.
- The result of the float division is $3/5 = 0.6$.

Print:

```
0
0.6
```

Input Format

The first line contains the first integer, a.

The second line contains the second integer, b.

Output Format

Print the two lines as described above.

Sample Input 0

```
4
3
```

Sample Output 0

```
1
1.33333333333
```

Change Theme Language Pypy 3

```
if __name__ == '__main__':
    a = int(input())
    b = int(input())
```

Line: 3 Col: 21
